109 0679 1
110 0680 1 Read characters up to a terminator into the command buffer. The
111 0681 1 characters are echoed as they are read. Delete is handled and
112 0682 1 CTRL/U aborts the operation.
113 0683 1
114 0684 1 FORMAL PARAMETERS:
115 0685 1
116 0686 1 C The first character to be handled (it was read previously)
117 0687 1
118 0688 1 COM_BUF Pointer into the command buffer where the characters should
119 0689 1 be placed.
120 0690 1
121 0691 1 END_COM A character pointer to receive the pointer after the characters
122 0692 1 have been read.
123 0693 1
124 0694 1 TERM A special terminator. (Escape, CSI and SS3 are always terminators.)
125 0695 1
126 0696 1 RES_TERM The actual terminator.
